

# IMPORTANT ANNOUNCEMENT - Thousands of Pounds to be Claimed! Claim today and make sure you don't miss out!

## In Association with the **General Miners Advice Unit (GMAU)**

### **Have you made a miners Vibration White Finger (VWF) claim against the National Coal Board (NCB)?**

Were you advised by your former solicitors that you may have been eligible to pursue an additional claim for services? If not, you may be entitled to additional compensation.

Thousands of ex miners have had their VWF claims settled for much less than they should have been due to their solicitor missing some of the compensation in the claim.

**In some cases this amounts to five figure sums.**

**We can help you recover this extra money for you - 100% compensation guaranteed.**

Many miners from the community were not paid enough compensation under the National Coal Board (NCB) vibration white finger (VWF) handling agreement implemented by the Government to compensate former miners in 1999. The scheme came to an end in 2002.

**Pro-Law Network Solicitors** which is headed by Martin Rounthwaite is claiming back thousands of pounds of unpaid miners' money from the solicitors who originally dealt with the claim.

**Pro-Law Network Solicitors** has ensured the recovery of the balance of the compensation for miners all over the UK, as Martin Rounthwaite, partner at Pro-Law Network solicitors explained.

He said: "When the VWF handling agreement was first established, there were hundreds of firms of solicitors all over the UK submitting claims on behalf of current, ex and even deceased miners."

Consequently, many other firms of solicitors did not advise their client's correctly about making a claim for services under the VWF handling agreement.

The General Miners Advice Unit (GMAU) is a trading name of ACE (UK) Ltd who is regulated by the Ministry of Justice in respect of regulated claims management activities. Our authorisation number is CRM12779.

Therefore many miner's claims have been under settled.

Basically under the VWF handling agreement if a miner reached a certain level of disability following their medical assessment in relation to their vibration white finger then automatically they would have been eligible to pursue a services claim. A services claim consisted of any assistance with the tasks such as gardening, decorating, DIY, car maintenance, car cleaning and window cleaning.

In some cases the missing, unclaimed portion of the compensation amounts to five figure sums, a huge amount of money. There are thousands of miners across the UK who have been affected by this and suffered financially to a greater or lesser degree because of the advice they received from their former solicitors.

For further help and assistance, or to see if your relative has a claim, please contact the **General Miners Advice Unit (GMAU)** on free phone 0800 822 3424.
